**Fruit and Ornamental Nursery
Stock—Miscellaneous Supplies**

GENERAL INSTRUCTIONS

WE cannot overemphasize the importance of ordering early. All orders are filled in rotation and since this is a seasonable business, the earlier you plant the better, especially with Fruits or dormant plants. All orders will be filled at the proper planting time which in the SPRING is April, May and June; in the FALL, September to December.

DELIVERIES: Orders within a local area or 10 mile radius from the Nursery will be delivered free providing we have a full load or a regular delivery in that direction. Beyond this, write for special delivery rates.

GUARANTEE: Only Ornamental stock is covered by the Penna. Nurserymen's Assoc. uniform replacement agreement; as follows: Provided account is paid in full within 30 days, and plants receive reasonable care, we will replace at one-half price any plants that fail to show any growth within 60 days if planted in the spring or by May 1st if planted in the fall. We cannot however be responsible for plants or trees lost due to droughts or winter weather conditions or damage by dogs. NO FRUIT TREES or Small FRUIT PLANTS are covered by the above guarantee.

RATES: 1 to 9 at the each rate; 10 to 49 at the 10 rate; 50 or more at the 100 rate.

TERMS: CASH except when expressly agreed otherwise. No C. O. D. orders accepted unless accompanied by a remittance of at least one-third in Cash.

LANDSCAPE SERVICE: We are prepared to furnish plans and specifications for any size planting or project and will plant at reasonable rates, all such orders as far as labor conditions permit.

AN INVITATION is extended at all times to our customers and friends to visit our 20 acre nursery here at Shiloh and see the quality of the stock we grow.

Prices subject to change without notice.

Closed All Day Sunday.

SHILOH LANDSCAPE SERVICE

THE VOGUE for beauty outside the home, as well as within, is upon us—and this new vogue finds its most charming expression in the modern outdoor living room.

In the average home building lot, there are two sizeable spaces left after the home is erected—the “front yard” and “back yard.” The back yard of yesterday was anything but attractive—today it shines in resplendent new dress. The landscape architect has created the plans and the modern nursery can supply the finest and most attractive plants and shrubs which can be arranged in living walls to shut out the discordant world and create the loveliest of home pictures.

Think of what it means for your children to grow up in the environment of beautiful plants and flowers. The outdoor living room provides the ideal background for children’s play, which is far better than to have them grow up on the streets.

One of the first essentials is a working plan of your prospective planting. It is not a question of how much to plant as it is, what to plant and where. Our Landscape Department will gladly draw up plans, make planting lists and offer suggestions. Call or write us for a personal interview, as we believe if we can assist you in making your surroundings more beautiful, we have made another friend, and it is only with the support of our friends that we can continue to serve.

HYBRID TEA ROSES (Everblooming)

Roses are still far from plentiful. Adverse growing conditions and an unusually heavy demand has created shortages in most of the popular varieties. All orders taken subject to prior sale.

Dormant plants, No. 1 grade only, will be supplied in the fall and in the spring until May 1st; after that all plants will be from Cloverset pots.

TREE PEONIES

Three Peonies are really shrubs in character, and bloom earlier than the Herbaceous types. They grow 3 to 4 feet in height and when once established bear as many as 100 blooms and last for many years.

The following prices are for strong 4 to 5 year old plants that have already bloomed in the nursery and range in height and according to variety from 12 to 24 inches.

SUCCESSFUL PLANTING AND CARE OF NURSERY STOCK

The Success of any planting depends upon good stock, proper planting and a reasonable amount of attention thereafter. For best results, we list a few general instructions that should be carefully followed:

ARRIVAL OF STOCK All stock will be delivered at proper planting time and if you find it impossible to plant immediately, all bundlers of dormant Trees, Shrubs or Roses should be opened, thoroughly watered and heeled in the ground. Never allow the roots to be exposed to the sun or air.

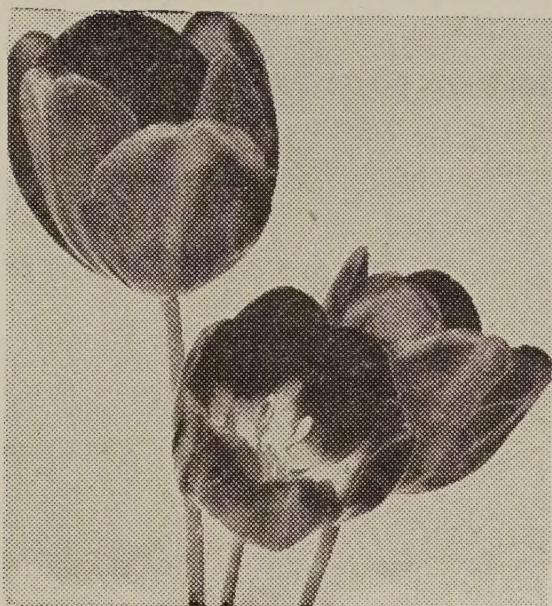

PLANTING Dig all holes large enough to receive the roots without crowding or doubling. Set shrubs so that there will be at least 2 inches of soil over the roots. Shade trees should have about 4 inches. Balled and Burlapped stock should be set slightly deeper than the top of the ball.

Always fill in good top soil about the roots and tamp firmly. After hole is two-thirds full plenty of water should be added and only after this has soaked away should the planting be completed. All tall Shade trees and Evergreens should be staked or guyed as soon as planted to prevent swaying by the wind and can be removed as soon as you are sure trees are established.

PRUNING This is a broad subject and rather difficult to explain briefly. All bare root trees and shrubs must be top pruned to offset the loss of some roots in digging and also to take up the shock of transplanting. Dormant Roses must be cut back to at least 4 or 6 inches of the budded joint or point of branching on the main stem. Evergreens should be pruned annually the first year after planting so as to preserve their shape, and keep them within bounds. The tall growing Evergreens such as Spruce or Pines should only be pruned on special occasions.

CARE Since all trees and plants are living subjects, they require plenty of water especially the first season after planting if the ground becomes hard and dry or the weather too hot. If your soil is poor oh "run down," an annual application of a good plant food is beneficial and a mulch of Peat Moss will also help to conserve moisture.

For more detailed information we will send you FREE, a valuable 48 page illustrated booklet on Correct Planting Methods and Garden Design. It is truly the best reference guide available and it's yours for the asking.
